# Solar with battery tender price in Australia 2026

## Overview

---

In Australia, a fully installed rooftop solar system paired with a home battery now usually falls between \$14,500 and \$32,000 (May 2025 prices) once federal Small-scale Technology Certificates (STCs) and the soon-to-launch Cheaper Home Batteries Program are factored in.

In Australia, a fully installed rooftop solar system paired with a home battery now usually falls between \$14,500 and \$32,000 (May 2025 prices) once federal Small-scale Technology Certificates (STCs) and the soon-to-launch Cheaper Home Batteries Program are factored in.

The average price of home solar batteries is between \$1,000 to \$13,000 per kWh of capacity installed. However, the price varies depending on the brand, size and location. In the early stages of solar battery technology, the cost was undeniably high. They were primarily the domain of early adopters.

Home » Commentary » Batteries the key as cell prices plunge and wind and solar ramp up towards 50 pct share Renewable generation should be around 50 per cent of supply on Australia's main grid by July, 2026, although it might be a bit less depending on progress on the second stage of Golden Plains.

The price you'll pay for a battery with the rebate depends on whether you are: In this guide, I break down the real costs, explain which rebates are available and how they affect your payback. Typical installed prices for popular solar batteries in Australia: \*These prices don't include a hybrid.

In Australia, a fully installed rooftop solar system paired with a home battery now usually falls between \$14,500 and \$32,000 (May 2025 prices) once federal Small-scale Technology Certificates (STCs) and the soon-to-launch Cheaper Home Batteries Program are factored in. A popular 6.6 kW array with.

The table below displays average, indicative battery installation prices from a range of installers around Australia, most of whom are active in the Solar Choice network. Prices include installation, GST and the federal battery rebate. \*Includes the installation of the battery only. You must.

A guide to solar battery prices and value. Solar battery prices have come down significantly with the introduction of the federal government rebate. The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries.

How much does a 10 kWh solar battery cost in Australia?

The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries. A newer technology, battery storage has been viewed as expensive - especially when comparing the payback of a battery system against its expected life.

Are solar batteries the future of Australia?

One in three homes across the nation have rooftop solar panels, harnessing the sun's energy to power homes and reduce electricity bills. As the world shifts toward a greener future, another technology has begun to capture many Aussies: solar batteries.

Are solar panels a good investment in Australia?

These savings figures are for new panel and battery systems: Throughout Australia, average payback times on solar panel and battery systems range from 6.2 years to 10.1 years. The economics are far more attractive in some states like South Australia, Queensland and Western Australia.

How much does a solar battery cost?

Thanks to falling prices and the federal battery rebate, thousands of households can now expect payback within the warranty period, particularly if they use a lot of power at night or join a Virtual Power Plant. In summary: Price Range: Popular solar batteries have an installed cost between \$8,000 and \$13,000 including the federal rebate.

What is a 2025 solar battery rebate?

At the midway point of 2025 was a key turning point in this equation as the federal battery rebate was introduced which offers a discount of around 30% for a typical 10kWh battery. For most homeowners this shaved around 3-4 years off the payback period of a solar battery and has triggered a large uptake in solar battery adoption.

## Solar with battery tender price in Australia 2026
