This year's Outlook provides the most comprehensive and data-driven overview yet of Slovakia's renewable electricity sector. At a time when energy policy, climate goals, and market dynamics are rapidly evolving, this publication is both a reflection of where we stand and a guide to where we must.

By 2030, the country aims to achieve 1.4GW of solar PV capacity, 0.8GW of wind power and 1.8GW of hydropower. After almost 10 years of a stagnant solar PV market, in 2023 the country added approximately 270MW of new solar PV capacity, marking a significant rise from the previous years, deploying.

We offer complete solutions for all your solar projects. From panels to inverters to batteries, we have everything you need. We offer the best value for money. Our prices are designed to be affordable for any business, regardless of size. Take advantage of our 15 years of experience with.

Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030. [1] To ensure the security and affordability of electricity and heat generation, the state is poised to support renewable energy sources.

will key the achievement of 2030 and 2050 climate targets. In order to support investment in batteries, first the right legislation must be in place, then the funding, followed by an honest assessment of technical capabilities. Slovakia is in the process of transposing Winter Package legislation to.
