# Standalone energy storage tender price in Belgium 2026

## Overview

---

How much battery capacity will be paid by winter 2028-2029?

Aurora Energy Research calculates that over the past CRM auction rounds, 1.1 GW of new-build battery capacity was selected to receive capacity payments by winter 2028-2029. Over the past four auction rounds, a total of 13 new large-scale BESS projects were selected, with ENGIE, Storm, and GIGA Storage securing the largest contracts.

Why is Belgium a good place to invest in a battery?

Other factors that make Belgium an appealing location for battery investments are the exemption of TSO grid fees and high revenues from balancing market (mainly FCR and aFRR),” Simon De Clercq, senior research associate at Aurora Energy Research, told ESS News.

Why is Belgium's storage fleet growing so fast?

Belgium’s storage fleet is growing at a fast pace, not the least due to the opportunity to secure contracted revenues via its CRM auctions. On the last day of October, system operator Elia published the results of the CRM auctions held this year, showing that a total of 450 MW of BESS had secured contracts.
