Standalone energy storage tender price in Greece 2025

Overview

The starting price for the first tender for battery energy storage projects is set at €115,000 per megawatt per year (€/MW/year). In other words, in order to claim the granting of investment and operating aid, investors should submit offers that will move below the specific amount.

The starting price for the first tender for battery energy storage projects is set at €115,000 per megawatt per year (€/MW/year). In other words, in order to claim the granting of investment and operating aid, investors should submit offers that will move below the specific amount.

The average subsidy price in the third auction exercise came at €52589.16/MW/year. The lowest successful bid stood at €43927/MW/year, concerning a 25 MW/100 MWh project in the Western Macedonia region. The highest awarded subsidy came at €58773/MW/year and refers to a 7.9 MW/31.6 MWh project.

These units will receive an average operational support slightly above €48,000 per megawatt. The highest bid was submitted by Plain Solar at €58,700 per megawatt, while the lowest came from Ecosolar at €42,500 per megawatt. The average bid price was lower than that of the first competitive process.

With a fast track schedule, the Waste, Energy and Water Regulatory Authority (RAAEF) will announce, within the next two days, the first tender for investment and operational support for energy storage units (standalone batteries), which is expected to take place at the beginning of July, with the.

A draft ministerial decision envisages the installation of 3.55 GW of standalone battery energy storage systems which will be granted priority connection to the transmission or distribution grid and operated on a merchant basis without subsidy support. From ESS News The Greek Ministry of Energy and.

Greece has launched its third tender for battery energy storage capacity, seeking to award 200 MW of projects, which will compete for subsidies of EUR 200,000 (USD 217,920) per MWh. Battery energy storage systems (BESS) License: CC0 1.0 Universal (CC0 1.0) Public Domain Dedication. The auction is.

Greece has launched its third and final tender under a 1-GW program to support standalone battery energy storage systems (BESS), aiming to allocate 200 MW of capacity with available subsidies of EUR 200,000 (USD 217,920) per MWh. This move, approved by Greece's Regulatory Authority for Energy. Does Greece have a battery storage subsidy program?

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW unsubsidized BESS scheme.

Will Greece install 900 MW of storage by 2030?

According to the Greek National Energy and Climate Plan (NECP), the nation aims to install 4.3 GW of storage by 2030. Thus far, 900 MW has been allocated via the Greek Regulatory Authority for Energy, Waste, and Water (RAAEY) tenders. Therefore, the remaining share would be delivered under the new plan but without any subsidy support.

How many projects have been awarded in Greece's first battery energy storage system?

The Greek Regulatory Authority for Energy has confirmed that 411.8 MW of projects have been awarded in the country's first standalone battery energy storage system (BESS) tender, which has attracted huge interest among developers. Investment and operating aid will be granted to 12 projects put forward by seven proponents.

How much power will Greece have by 2030?

The government now aims for 2.65 GW of battery projects on the transmission grid and a further 900 MW on the distribution grid. According to the Greek National Energy and Climate Plan (NECP), the nation aims to install 4.3 GW of storage by 2030.

Does Greece have a Bess subsidy program?

Moving forward, Greece is abandoning subsidizing BESS via auctions. Instead, the country has recently launched a new program for 4.7 GW of unsubsidized BESS which will be offered priority grid connections on a merchant basis without subsidy support.
