

## Global PV Storage Insights

# Successful bid price of LFP battery system project in Korea 2030

## Overview

---

South Korea's LG Energy Solution said on Wednesday it has secured a \$4.3 billion contract to supply lithium iron phosphate (LFP) batteries globally over a three-year period beginning in August 2027.

South Korea's LG Energy Solution said on Wednesday it has secured a \$4.3 billion contract to supply lithium iron phosphate (LFP) batteries globally over a three-year period beginning in August 2027.

LGES signed a five-year contract with Renault to supply LFP batteries to Ampere from late 2025 through 2030, with a total capacity of approximately 39 GWh to power about 590,000 BEVs. The deal is LGES' first large-scale supply deal for LFP batteries and could indicate that South Korean battery.

South Korea's LG Energy Solution said on Wednesday it has secured a \$4.3 billion contract to supply lithium iron phosphate (LFP) batteries globally over a three-year period beginning in August 2027. The company did not disclose the identity of the customer or specify whether the batteries will be.

Korean battery makers will produce cheaper lithium iron phosphate (LFP) batteries no later than 2026, their CEOs say, to challenge the dominance of a few Chinese names like CATL and BYD. "We've already completed the development of LFP batteries, and are set to start mass production in 2026 after.

LG Energy Solution (LGES), Korea's leading battery maker, said Wednesday it has signed a 5.9 trillion-won (\$4.26 billion) lithium-ion phosphate (LFP) battery supply deal with an overseas client. In a regulatory filing, LGES said it will supply LFP batteries to the unnamed client for three years.

Samsung SDI has secured the upper hand in the first round of the government-led energy storage system (ESS) central contract bidding, which is valued at over 1 trillion won. Despite the relatively lower price competitiveness of its NCM (nickel-cobalt-manganese) batteries, Samsung SDI outperformed.

Korea LFP Inc. specializes in manufacturing lithium iron phosphate batteries

(LFP batteries) and develops and manufactures customized batteries for a variety of devices, including cordless products/mobility products, industrial machinery, and energy storage systems (ESS). The company started LFP. How much do LFP batteries cost in China?

"According to the battery price model at S&P Global Mobility, the price of LFP batteries in China has reached \$52 per kWh in 2024, which is approximately 25% lower than the price of NCM811 batteries.

Where are LFP batteries made?

Around 90 percent of the world's LFP batteries are made by Chinese companies, with CATL and BYD racing for the top two spots. SK also unveiled a Winter Pro LFP battery at the battery show at Coex, which improves the energy density of the battery by 19 percent in the winter.

Who is supplying LFP batteries to ampere?

LGES and CATL are assigned to provide Ampere with the LFP batteries that will power several EV models from the Renault and Alpine brands until 2030. CATL will supply LFP batteries to Ampere from its Hungary-based plant and LGES will supply NCM and LFP batteries from its Poland-based facility.

Will lges offer a competitive price for LFP batteries?

LGES claims that it will offer a competitive price for its LFP batteries. According to the company, the price advantage in LFP will also come from implementing the cell-to-pack strategy in the manufacturing process.

When will LFP batteries start production?

"We've already completed the development of LFP batteries, and are set to start mass production in 2026 after detailed discussions with clients," SK On CEO Lee Seok-hee said during an interview on the sidelines of InterBattery 2024 held in Coex, southern Seoul, on Wednesday.

Can a local LFP battery supply chain reduce battery costs?

While mainland Chinese companies such as Contemporary Amperex Technology Co. Ltd. (CATL) and BYD continue to dominate the LFP battery manufacturing ecosystem, US and European legacy carmakers are now looking to build local LFP battery supply chains to cut battery costs by 30%-40%.
