How much will battery storage cost in 2025?

Overall investment in battery storage increased by almost 40 percent in 2020, to \$5.5 billion, said Paris-based International Energy Association (IEA). Other market forecasts say it could grow between \$12 billion and \$16 billion by 2025. Read also: Global oil, gas investment projected to grow by \$26bn in 2022.

What is the growth rate of Nigeria battery market?

Analysts at Data Bridge Market Research say the Nigeria battery market is growing with a compound annual growth rate (CAGR) of 6.3 percent in the forecast period of 2020 to 2027 and is expected to reach \$119.65 million by 2027 mostly through increasing adoption at the household level.

Why are investment dollars shifting from large-scale utilities to battery-based energy storage?

Investment dollars are shifting from large-scale utilities for battery-based energy storage systems since Tesla provided a proof of concept for the commercialisation of electric cars and advanced battery technology. Nigeria's battery manufacturing market is ennobled by imports from China and India.
