Successful bid price of business energy storage project in Norway 2025

Overview

The Illvatn project, with an estimated price tag of NOK1.2 billion (US\$113 million), is expected to begin construction in 2025, targeting 2028 or 2029 for full operation. “We have carefully developed this project over an extended period, in close dialogue with authorities and the local community. What projects are under development in Norway?”

Another project under development in Norway is a new power plant at Torolmen, in the Årdal municipality, with an estimated annual production of around 30 GWh. The total investment for this project could reach NOK290 million (US\$27.4 million), with potential construction starting as early as 2027.

Is stationary energy storage a good idea in Norway?

Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world’s first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability. These are impressive records. Even so, stationary energy storage is beginning to steal the limelight.

What are the key market trends for battery storage?

It covers key market trends, with a particular focus on the shift toward utility-scale storage, the continuing growth of residential and commercial installations, and the evolving role of battery storage in supporting Europe's clean energy goals.

How much funding does Northern Lights receive?

Northern Lights was nominated to receive 131 million euros under the EU’s Connecting Europe Facility (CEF) funding scheme. Nearly 480 million euros have been allocated from the CEF to four CO₂ transport and storage projects in Europe.
