

## Global PV Storage Insights

# Successful bid price of hybrid renewable storage project in Estonia 2025

## Overview

---

Sunly, in collaboration with Metsagrupp, is developing a 16 MW / 32 MWh battery energy storage system (BESS) next to the 45 MW Raba Solar Park in Pärnu County, Estonia. The total project cost is US\$7.6 million. The project will be built without subsidies.

Sunly, in collaboration with Metsagrupp, is developing a 16 MW / 32 MWh battery energy storage system (BESS) next to the 45 MW Raba Solar Park in Pärnu County, Estonia. The total project cost is US\$7.6 million. The project will be built without subsidies.

Assessing the impact of energy storage on electricity prices in Estonia and neighbouring countries. In its first phase, the study models and compares BESS and PHS systems, exploring their effects on market prices and renewable integration. In its second phase, the project forecasts component-based.

Antwerp, two battery-based energy storage projects. In May 2023, we launched our largest European battery-based energy storage project at the Antwerp platform in Belgium. With its 40 containers, the site will develop a capacity of 75 MWh, which is equivalent to the daily consumption of almost 100,000 households.

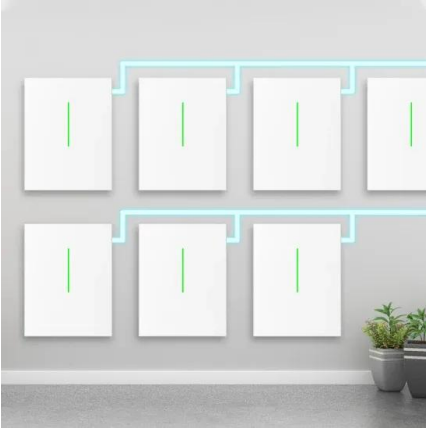

Eesti Energia will build its first large-scale storage device at the Auvere industrial complex later this year. The goal is to balance the fluctuations in electricity prices caused by the growth in renewable energy production as well as to support the stability of the electrical system. According to the company, the storage will have a capacity of 100 MWh.

Sunly, in collaboration with Metsagrupp, is developing a 16 MW / 32 MWh battery energy storage system (BESS) next to the 45 MW Raba Solar Park in Pärnu County, Estonia. The total project cost is US\$7.6 million. The project will be built without subsidies. Construction is set to begin this summer.

Last year, Estonian companies Sunly and Metsagrupp announced work on the 244-megawatt Risti solar park. The €120M facility represents the first phase of a planned hybrid energy complex in the region. The installation will feature nearly 350,000 solar panels equipped with tracking technology to maximize energy production.

The Paldiski Pumped Hydro Energy Storage plant, developed by Energiasalv Pakri OÜ, is an EU Project of Common Interest (PCI project), making it a key component of the region's renewable energy strategy. It is the only permitted greenfield pumped hydro energy storage project in the Northern Baltic.

## Successful bid price of hybrid renewable storage project in Estonia

### Energy Storage Costs: Trends and Projections

As the global community increasingly transitions toward renewable energy sources, understanding the dynamics of energy storage costs has become imperative. This ...

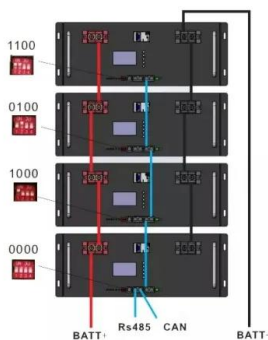

### Estonia Renewable Energy Government & Private Renewable ...

Explore the latest Estonia Renewable Energy Tenders and gain access to real-time government bids, eProcurement updates, and detailed information on government ...

### Estonia s new energy storage project policy in 2024

State aid for 225MW pumped hydro energy storage plant in Estonia A EUR600,000 (US\$595 million) grant from state agencies Enterprise Estonia and KredEx has been given to a pumped hydro ...

### Hybrid Energy Storage Systems Driving Reliable Renewable Power

Hybrid Energy Storage Systems combine technologies to deliver reliable renewable power,

enhancing grid stability and clean energy adoption.

## Mulilo and Scatec emerge as preferred bidders for R9.5bn battery

Independent power producers (IPPs) Mulilo and Scatec have been named as preferred bidders to develop 616 MW/2 464 MWh of new battery storage capacity at a cost of ...

## Hybrid Renewable Energy Projects: A Synergy of Solar, Wind, ...

These projects represent a significant step towards a sustainable energy future, where the strengths of solar, wind, battery storage, and hydrogen production are combined to ...

## Estonian Government approves Long-Term Energy Development ...

At the moment, the Paldiski project is the only long-term storage option for the Estonian government. An independent benefit analysis has also been submitted to the ...

## Hybrid projects - a new standard in renewable energy

In the face of the global energy transition and the urgent need for decarbonisation, hybrid projects are becoming a breakthrough solution. By combining solar ...

## Energy Storage Systems (ESS) Projects and Tenders

Content Owned by MINISTRY OF NEW AND RENEWABLE ENERGY Developed and hosted by National Informatics Centre, Ministry of Electronics & Information Technology, ...

### [Open CIS tenders](#)

Stage A for CIS Tender 3 project bids closed on 18 December 2024. Projects were assessed against the eligibility and merit criteria and shortlisted projects were invited to ...

## RENEWFM: EUR52 million to 9 renewable energy ...

The awarded projects will add a total capacity of 445.65 MW of renewable energy installations, and are expected to be commissioned between 2027 and 2028.

## REQUEST FOR PROPOSALS FOR Q3/Q4 2025 Renewable ...

Energy Availability: Maximum and minimum monthly capacity factors (for hybrid projects, please provide capacity factors for both renewable resource only, as well as for renewable resource ...

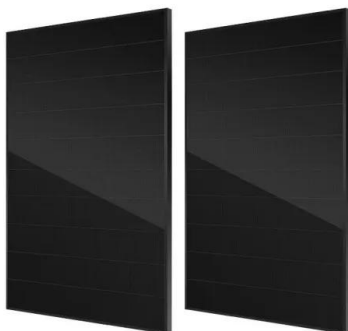

## Next-gen renewables: Risk, resilience and insurance readiness

From boomers, to Gen X, to millennials, to Gen Z, the new evolution is upon us: Gen R, the next phase of renewables. In this Renewable Energy Market Review, the theme is clear. Despite ...

## Hybrid Energy Storage System: Optimizing ...

A hybrid energy storage system (HESS) is a revolutionary approach to energy storage that combines multiple technologies to maximize efficiency, reliability, and cost-effectiveness. As renewable energy sources like ...

## Estonia sets its sights on 100% renewable energy by 2030

Estonia, known for its ambition and innovation, has charted an audacious path towards sustainability, aiming to power its future entirely with renewable energy sources by 2030. ...

## Analysis of storage and electricity price forecast for large ...

Project overview The Ministry of Climate in Estonia and Ramboll are assessing the impact of energy storage on electricity prices in Estonia and neighbouring countries. In its first phase, the ...

## Baltic States: New Chapter of Energy Independence ...

From the first ten days of February 2025, Estonia, Latvia and Lithuania mark a turning point in their energy history by becoming fully independent from the power systems of Russia and Belarus. This ...

## Winning Energy Storage Bids in 2025: Strategies for Renewable

Recent data shows that solar-plus-storage projects now account for 40% of all renewable energy tenders worldwide--but what separates winning bids from the rest?

## Energy Outlook 2025: Energy Storage

Energy storage is rapidly emerging as a vital component of the global energy landscape, driven by the increasing integration of renewable energy sources and the need for grid stability. As the world transitions towards cleaner ...

## Hybrid Renewable Energy Systems--A Review of ...

The growing need for sustainable energy solutions has propelled the development of Hybrid Renewable Energy Systems (HRESs), which integrate diverse renewable sources like solar, wind, biomass, geothermal, hydropower ...

## ESTONIA: Baltic Energy Market News Flash 5th Edition

Energy news in Estonia WIND In June 2023, Estonia's first wind and solar hybrid park Purtse (with the possibility of adding energy storage), developed by Enefit Green, was opened. It is ...

## Boost efficiency with hybrid renewable energy projects

How do hybrid renewable energy projects work? The most common form of hybrid project is combining wind or solar power plants with battery energy storage solutions (BESS). This ...

## Analysis of storage and electricity price forecast for large ...

The second part of the analysis presents projected electricity price compositions in Estonia and neighbouring countries for the years 2025, 2030, and 2035 across different voltage levels.

## European Commission Backs Nine Renewables ...

The European Commission has allocated EUR 52 million (\$58.7 million) through the EU Renewable Energy Financing Mechanism (RENEWFM) for nine projects in Finland and Estonia. The funding aims to

## A postcard from... Estonia , Energy Storage Coalition

As Europe accelerates its energy transition, energy storage is emerging as a critical piece of the puzzle. These interviews explore energy storage business cases across the ...

## Eesti Energia to install large-scale storage device by ...

Eesti Energia will build its first large-scale storage device at the Auvere industrial complex later this year. The goal is to balance the ...

## RENEWFM funds EUR52 million for 9 renewable projects in Finland, Estonia

RENEWFM invests EUR52 million in nine renewable energy projects across Finland and Estonia. Explore the future of green energy today!

## REQUEST FOR PROPOSALS FOR Q1/Q2 2025 Renewable ...

Energy Availability: Maximum and minimum monthly capacity factors (for hybrid projects, please provide capacity factors for both renewable resource only, as well as for renewable resource ...

### Estonia: first grid-scale BESS to be replicated in Baltics/Poland

Eesti Energia discusses a BESS project which will be the first grid-scale one in Estonia, and its plans for similar deployments elsewhere.

### Estonia approves battery project with grid-scale impact

Overall, the project represents one of the largest renewable energy investments in the region in recent years -- and shows why Estonia is placed so high on the energy transition success scores. Once operational, it will also reduce ...
