# Successful bid price of office building energy storage project in Hungary 2026

## Overview

---

How much does Hungarian government spend on energy storage projects?

The Hungarian government has allocated HUF 62 billion (EUR 158 million) for energy storage projects with an overall 440 MW in operating power. Hungarian authorities launched the tender for grid-scale batteries on January 15 and received offers until February 5. The winning bidders were selected a few days ago.

When will energy storage facilities be able to be built?

From June, system operators and distribution companies will be able to apply for subsidies to build energy storage facilities by the summer of 2025 at the latest, the Ministry said. The €155 million (US\$171 million) tender amount can be applied for in June 2023 and the winners will be chosen during the summer.

How do energy storage subsidies work?

The subsidies are secured via the National Recovery and Resilience Plan and the state budget. They consist of non-refundable investment support and income compensation for the construction of energy storage facilities and their operation for at least ten years. The operational support will be provided through two-way contracts for difference.
