# Successful bid price of office building energy storage project in Mauritius 2030

## Overview

---

On June 12th, Linyang Energy announced that a consortium formed by its Linyang Power Services and China Water Resources and Electric Power Corporation has successfully won the bid for the Mauritius government's grid side energy storage project, with a bid amount of 24.9889 million US.

On June 12th, Linyang Energy announced that a consortium formed by its Linyang Power Services and China Water Resources and Electric Power Corporation has successfully won the bid for the Mauritius government's grid side energy storage project, with a bid amount of 24.9889 million US.

On June 12th, Linyang Energy announced that a consortium formed by its Linyang Power Services and China Water Resources and Electric Power Corporation has successfully won the bid for the Mauritius government's grid side energy storage project, with a bid amount of 24.9889 million US dollars.

With a revised renewable energy target of 60% by 2030, the national institution is updating the roadmap to identify the most economic and feasible scenario to achieve the compact targets, including investigating the possibility of using hybrid renewable energy as base-load and other new sources.

- Decarbonize energy sector to achieve 60% of renewable energy by 2030 along with the phasing out of the use of coal by the same year.
- In order to meet the set target, the Central Electricity Board (CEB) has: (a) launched several renewable energy schemes covering a broad spectrum of the.

tion that by 2030, it will reduce its emissions by 30%. One of the key mitigation actions that it proposed was the expansion in solar, wind ft to a Low-Carbon Economy” to the Green Climate Fund. In 2016, the project was approved and Mauritius was among the first batches of countries to receive a.

Mauritius is paving the way for a sustainable future through ambitious renewable energy goals, strategic investments, and innovative practices. With a strong commitment to reducing greenhouse gas emissions and transitioning to cleaner energy sources, the island nation is positioning itself as a.

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, marking a significant stride towards its ambitious goal of achieving 60% renewable energy in the electricity mix by 2030. The inauguration ceremony, attended by Minister of.
