# Successful bid price of residential ESS project in Netherlands 2026

## Overview

---

Will new construction production increase in Amsterdam?

New construction production in Amsterdam could therefore increase significantly in the coming years by relaxing the construction and program requirements. Program requirements play a crucial role in many projects in whether or not the business case of a housing development can be calculated.

Does the Netherlands have a high demand for housing in non-residential buildings?

Answer: Although the recovery in non-residential building is anticipated to be slower, the Netherlands has a persistently high demand for housing, which is bolstered by government programs like the Woningbouwimpuls scheme, which offers financial support to housing developments.

Will the business case for exploitation of real estate improve in 2024?

The business case for exploiting real estate is expected to improve vis-à-vis this strategy if capital values stabilise during 2024. With the persistent housing shortage and stability of rental income flows, there is still interest in residential investment, especially in the affordable rental segments.

How much money is invested in New construction in 2022?

With a volume of €1.9 billion, this category lagged far behind the volumes achieved in previous years. For instance, only €1.1 billion was invested in new construction – a reduction of 59% compared to 2022. The investment volume in existing buildings was higher compared to last year, totalling €818 million.
