

## Global PV Storage Insights

# Successful bid price of solar with battery project in Italy 2026

**2MW / 5MWh**  
**Customizable**

## Overview

---

The 2026 Italian Capacity Market auction assigned 42.8 GW of derated capacity and saw awarded prices for new capacity dropping to 56.2 €/kW, while clearing prices for existing capacity remained at the price cap.

The 2026 Italian Capacity Market auction assigned 42.8 GW of derated capacity and saw awarded prices for new capacity dropping to 56.2 €/kW, while clearing prices for existing capacity remained at the price cap.

Italy's first solar auction under the transitional FER X incentive scheme drew 17.5 GW in project proposals and an additional 2.87 GW in wind bids, according to state-run energy agency Gestore dei Servizi Energetici (GSE).  
From pv magazine Italy The first solar energy auction under Italy's new.

The 2026 Italian Capacity Market auction assigned 42.8 GW of derated capacity and saw awarded prices for new capacity dropping to 56.2 €/kW, while clearing prices for existing capacity remained at the price cap. I consent to my submitted data being processed and stored by Timera Energy in.

Italy's energy management agency, Gestore dei Servizi Energetici (GSE), has allocated 1.5 GW of capacity for agrivoltaic (agriPV) projects in the country's first dedicated auction. The auction saw significant interest, with 540 projects approved from a pool of 643 bids, amounting to over 1.7 GW of.

Italy's ambitious drive towards renewable energy integration, targeting 50 GW solar and 28.1 GW wind capacity by 2030, has created distinct pathways for Battery Energy Storage System (BESS) investments - the MACSE auction and Capacity Market auctions. Choosing between these mechanisms involves.

This bidding, implemented by the Italian energy management agency GSE, will allocate €323 million (approximately \$349 million) to support the development of agrivoltaic projects. These funds originate from the portion not fully allocated in the previous round of bidding, which amounted to €1.7.

Italy has awarded 366.9MW of solar and wind capacity in the country's 16th auction round for projects above 1MW of capacity, GSE data showed. Italy has

awarded 278.5MW of solar PV capacity across 53 projects and two wind projects with a total capacity of 88.4MW. Developers offered a maximum. How much does Italy pay for solar power?

Italy has awarded 278.5MW of solar PV capacity across 53 projects and two wind projects with a total capacity of 88.4MW. Developers offered a maximum discount between 2.01-7.91% from the auction ceiling price of €0.078175/kWh. The lowest bid was at €0.07199/kWh. Italy also allocated around 87.5MW for hydropower plants.

How many solar project proposals are there in Italy?

From pv magazine Italy The first solar energy auction under Italy's new incentive scheme for renewable energy, the "transitional" FER X program, has attracted 1,387 project proposals with a combined capacity of 17,537 MW, according to Italian energy agency GSE. Prequalified project developers have until Sept. 12 to submit final offers.

How many MW of solar power will Italian authorities allocate?

Italian authorities expect to allocate more than 600 MW of solar photovoltaic capacity through the auction. "The data confirm excellent participation in photovoltaics and a trend consistent with expectations for wind power," said Italian Energy Minister Gilberto Pichetto Fratin.

How much does a solar system cost?

Successful projects are expected to begin commercial operations by June 2026. The ceiling tariff for solar systems of 300 kW in size and below was €0.093 (\$0.098)/kWh; for systems of over 300 kW, the tariff was capped at €0.085 (\$0.089)/kWh.

Why did Italy ban ground-mounted solar panels on agricultural land?

This tender came in the wake of Italy's decision to ban ground-mounted solar PV installations on agricultural land earlier this year. The policy drew criticism from Italia Solare, the national solar trade association, which argued it could lead to €60 billion (\$63 billion) in lost private investments and tax revenues.

### BESS Investment in Italy: Which Market Option is Best?

Success in either market comes down to the specifics of your project - how long your battery can provide power (duration), how efficient it is,

and where it's located.

- Efficient Higher Revenue**
  - Max. Efficiency 97.5%
  - Max. PV Input Voltage 600V
  - 150% Peak Output Power
  - 2 MPPT Trackers, 150% DC Input Overvoltage
  - Max. PV Input Current 15A, Compatible with High Power Modules
- Intelligent Simple O&M**
  - IP65 Protection Degree: support outdoor installation
  - Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
  - SC & AC Type II SPD: prevent lightning damage
  - Battery Reverse Connection Protection
- Flexible Abundant Configuration**
  - Plug & Play, EPS Switching Under 10ms
  - Compatible with Lead Acid and Lithium Batteries
  - Max. 6 units Inverters Parallel
  - AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
