Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh. From ESS News Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's.

An auction for solar-plus-storage held in Israel by the country's Electricity Authority (PUA) awarded 609MW of solar PV alongside 2.4GWh of energy storage. The tender process concluded shortly before the end of 2020, awarding distribution grid-connected solar capacity paired with four hour duration.

Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh. Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

The Israeli Electricity Authority (IEA) has awarded contracts for 1.5 GW of high-voltage battery storage across 11 projects in a recent tender. The awarded facilities will be developed in three key regions, helping integrate renewable energy into Israel's power grid. The tender attracted 11 bidders.

The government has announced plans for Israel's first stand-alone energy-storage facility, consistent with the aims underpinning a revised draft climate bill (legally enshrining targets for carbon-free power generation). We expect renewables capacity to expand rapidly in 2023-27, as the government.

As of February 2022, the Israeli Ministry of Environment unveiled an ambitious renewable energy roadmap, aiming to achieve a 40% share of renewables in the country's power mix by 2030. This bold objective entails the installation of
