# Successful bid price of utility scale ESS project in South Africa 2025

## Overview

---

Why is Eskom's electricity demand declining compared to 2023?

Demand for electricity continues to trend down, peak demand is 1% lower for this time of the year compared to the peak in 2023 due to rapid growth of the private sector embedded generation. > Eskom fleet installed capacity remained unchanged in 2024 compared to 2023, energy generated from coal is relatively higher due to improved EAF.

How many MW is a Bess project?

The three windows have cumulated 1,744 MW in output power across windows of 513MW, 615MW, and 616MW, each with a four-hour duration. Electricity and Energy Minister, Dr Kgosientsho Ramokgopa said in the announcement that the five BESS projects will require a total investment of ZAR 9.5 billion (US\$530 million), with costs falling 40% from Window 1.

Will future bid Windows support a higher share of renewables?

The minister also added, in the press briefing, that future bid windows will incorporate grid-forming technologies to support a higher share of renewables (currently ~24%). Tristan is an Electrical Engineer with experience in consulting and public sector works in plant procurement.
