Successful bid price of utility scale ESS project in Switzerland 2026

Overview

Is Bess being monetised in the Swiss electricity market?

It is being monetised in the Swiss electricity market by both CKW, part of Axpo, and utility Alpiq, the announcement said. The BESS is part of a network of power plants, consumers and batteries, it added. The large-scale BESS market in Switzerland has been relatively quiet with renewable penetration on the country's grid still relatively low.

Can ESSs be applied in utility grids?

This article discusses ESSs applied in utility grids. Conventional utility grids with power stations generate electricity only when needed, and the power is to be consumed instantly. This paradigm has drawbacks, including delayed demand response, massive energy waste, and weak system controllability and resilience.

What is EWS' Bess project?

EWS' BESS project has primarily been deployed to help transmission system operator (TSO) Swissgrid keep the grid stable, via the provision of frequency response services to maintain a 50hz frequency. It is being monetised in the Swiss electricity market by both CKW, part of Axpo, and utility Alpiq, the announcement said.

Does Switzerland have a Bess system?

The BESS is part of a network of power plants, consumers and batteries, it added. The large-scale BESS market in Switzerland has been relatively quiet with renewable penetration on the country's grid still relatively low. Axpo commissioned its BESS in February this year while utility Thurplus commissioned a 3MW system in September last year.
