Successful bid price of wall mounted battery project in Serbia 2025

ESS

Overview

The contract is valued at approximately 5.5 million euros, with the deadline for applications set for 5 May. How much does electricity cost in Serbia?

Serbia changed both the price ceiling and the criterion for evaluating the bids. The maximum acceptable bid for wind farms is EUR 79 per MWh, compared to 105 per MWh last time. The ceiling for electricity from photovoltaic plants is EUR 72 per MWh, while it was EUR 90 per MWh last time.

How many applications were submitted for market premiums in Serbia?

Forty applications were submitted for market premiums within the procedure for the second round of renewable electricity auctions in Serbia, Balkan Green Energy News learns. The call for wind and solar power projects was launched in late November and the deadline for applications expired on February 5.

How many bids were received in the first auction?

A total of 40 applications demonstrates that the interest is much higher than in the first auctions, when 16 bids were received overall. They were completed in September 2023. After the qualification phase, it will be announced how many participants have valid applications for their bids. In the first auctions, eleven entered the second phase.

Successful bid price of wall mounted battery project in Serbia 2025
