Total investment cost of floor standing battery project in Ukraine

Overview

DTEK invested 125 million euros (\$146 million) into the project and built it in record time between March and August 2025, with commercial operations starting on Oct. 1.

DTEK invested 125 million euros (\$146 million) into the project and built it in record time between March and August 2025, with commercial operations starting on Oct. 1.

DTEK invested 125 million euros (\$146 million) into the project and built it in record time between March and August 2025, with commercial operations starting on Oct. 1. Constructions of this size normally take 12-15 months, but DTEK noted Ukraine's urgency for the project to commence before the.

The €140 million total investment aims to enhance power grid stability, bolstering Ukraine's energy security and independence. The project is split between six energy storage sites across Ukraine and will provide 400 MWh of dispatchable energy – enough to supply short-term power for 600,000 homes.

The project consists of an investment of €140 million (\$143 million) and will lead to the delivery of Ukraine's first large-scale battery-based energy storage portfolio and the provision of 400MWh of dispatchable power – declared enough to supply short term power for 600,000 homes. Construction of.

The project, valued at €140 million, consists of 698 Fluence Gridstack cubes distributed across locations with individual capacities ranging from 20 MW to 50 MW. The system is designed to provide 400 MWh of storage capacity, which the companies state is sufficient to power 600,000 Ukrainian homes.

DTEK, a leading Ukrainian energy company, has secured a \$72 million loan to build one of Eastern Europe's largest battery energy storage systems (BESS). The financing, provided by state-owned Oschadbank, Ukrgasbank, and PUMB, marks DTEK's largest domestic funding deal for new energy infrastructure.

DTEK received a \$72 million loan to help build a battery energy storage (BESS) facility, one of the biggest in Eastern Europe. The state-owned Oschadbank,

UkrGasbank, and PUMB will give out the funding. Before the attack began in February 2022, about 10% of Ukraine's energy came from renewable.
