# Total investment cost of home battery pack project in Bolivia

LFP 48V 100Ah

## Overview

---

The actual project cost was US\$10.4 million. Financing. The project was financed by an IDA credit of US\$50.0 million. The revised estimate following partial cancellation of the credit as US\$11.17 million. The amount disbursed was US\$10.4 million.

The actual project cost was US\$10.4 million. Financing. The project was financed by an IDA credit of US\$50.0 million. The revised estimate following partial cancellation of the credit as US\$11.17 million. The amount disbursed was US\$10.4 million.

The least-cost plan considers 279,710 new & upgrade connections at an estimated investment of USD \$717 million to achieve universal access by 2030. ● This includes 7,225 projects with 159,435 connections through grid extension, 5,594 connections through mini-grids, and 114,681 stand alone solar.

LA PAZ - Chinese battery giant CATL confirmed a \$1.4-billion investment to help develop Bolivia's huge but largely untapped reserves of lithium, cementing on Sunday a partnership with the government made in January. The agreement connects CATL, the world's largest manufacturer of electric vehicle.

Component 1: Electricity Services for Unserved Areas (estimated cost at appraisal was US\$52.45 million, of which US\$43.30 million IDA; actual cost at closing was US\$8.22 million IDA). This component aimed at providing electricity services to households and social institutions (mainly schools) in.

Based on meteorological data and electricity consumption profiles from the highlands of Bolivian Altiplano, this paper presents a modelling and simulation framework for analysing the performance and reliability of such systems. Reliability, as loss of power supply probability (LPSP), and cost.

These systems help provide basic lighting and information and communication technology, as well as dry cell charging for less than US\$100 per household. The smaller PV systems typically generate between one and ten watts and are

useful for replacing unhealthy and inefficient lighting sources such.

This investment grant (IGR) will support the loan operation BO-L1222 with the aim to contribute to the reduction of poverty and inequality in Bolivia by increasing electricity service coverage. The IGR will support the Government of Bolivia in financing subprojects for access to electricity.
