# Total investment cost of lead acid battery storage project in Slovakia

## Overview

---

The planned investment linked to the plant to be located in the town of Šurany amounts in total to an investment of EUR 1.2 billion. The investment will create 1.311 new jobs with wages higher than average in the region.

The planned investment linked to the plant to be located in the town of Šurany amounts in total to an investment of EUR 1.2 billion. The investment will create 1.311 new jobs with wages higher than average in the region.

The planned investment linked to the plant to be located in the town of Šurany amounts in total to an investment of EUR 1.2 billion. The investment will create 1.311 new jobs with wages higher than average in the region. In addition, the investor has committed to establish there a new research and.

InoBat Auto, the Bratislava-based battery maker with plans for a 10-GWh plant, has secured funding from the Slovakian government for a research and development (R&D) facility. This forms part of the EUR-100-million (USD 111.8m) first-phase fundraising in support of the ambitious Gigafactory.

BRATISLAVA, June 21 (Xinhua) -- A Chinese-Slovak joint EV car battery plant will receive 214 million euros (about 229.1 million U.S. dollars) in investment aid from the Slovak government, Slovakia's Ministry of Economy said Thursday. In November 2023, the Slovak government signed a Memorandum of.

The total investment is planned at €18 million and the power plant should be launched by the end of 2024. The project is at the beginning of an environmental impact assessment (EIA). "The power plant will be part of the group and will primarily generate electricity for our facilities," said Lenka.

The European Commission has approved a €44 million Slovak scheme to support electricity storage facilities to foster the transition towards a net-zero economy, in line with the Green Deal Industrial Plan. The scheme was approved under the state aid Temporary Crisis and Transition Framework, adopted.

will key the achievement of 2030 and 2050 climate targets. In order to support investment in batteries, first the right legislation must be in place, then the funding, followed by an honest assessment of technical capabilities. Slovakia is in the process of transposing Winter Package legislation to.

## Total investment cost of lead acid battery storage project in Slovak
