Total investment cost of utility scale ESS project in Poland

Overview

A total of PLN 4.15 billion, or €992 million (US\$1.07 billion), is available, split 90:10 between grants and loans. Grants can cover up to 45% of investment costs, 10%-20% more for smaller businesses, while loan financing (on preferential or market terms) can cover up to 100%.

A total of PLN 4.15 billion, or €992 million (US\$1.07 billion), is available, split 90:10 between grants and loans. Grants can cover up to 45% of investment costs, 10%-20% more for smaller businesses, while loan financing (on preferential or market terms) can cover up to 100%.

This comes on the heels of a historic €1.2 billion (\$1.3 Billion) allocation from the European Commission, specifically designed to support the installation of at least 5.4 GWh of new electricity storage facilities. The €1.2 billion aid will facilitate the construction of these storage facilities.

Polish utility PGE Group is planning to add more than 80 energy storage facilities through to 2035 to the tune of PLN 18 billion (\$4.7 billion). One of these will be the 981 MWh Zarnowiec battery energy storage project, which will be supplied with locally produced LG Energy Solution's grid-scale.

The European Commission (EC) has authorized a €1.2 billion (\$1.3 billion) Polish state aid scheme to support investment into electricity storage facilities. From ESS News The European Commission has approved a €1.2 billion Polish scheme to support investment into electricity storage facilities to.

On 23 July 2024, the National Fund for Environmental Protection and Water Management put under public consultation a new priority aid scheme entitled: "Energy storage facilities and related infrastructure for improving the stability of the Polish electricity grid". The funding under the Scheme is.

Greenvolt Group, through Greenvolt Power, a company specializing in utility-scale wind, solar and energy storage projects, has signed an agreement with BYD Energy Storage, one of the largest suppliers of Battery Energy Storage Systems (BESS) based in China. The contract includes the design and.

The call for proposals of projects to be subsidised under the Energy Storage Systems scheme financed from the National Recover and Resilience Plan opened on 17 February 2025. The scheme's objective is to build a large-scale battery energy storage system (BESS). What projects are eligible for the. What is the most advanced energy storage project in Poland?

The most advanced energy storage project in the PGE Group's portfolio is the Żarnowiec Energy Storage Facility. With a power output of 262 MW and a storage capacity of around 981 MWh, the facility will be by far the largest battery energy storage facility in Poland and one of the largest in Europe.

How many GWh of energy storage capacity will Poland have by 2035?

In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage capacity by 2035. Its plans involve more than 80 projects, the value of which is estimated at around PLN 18 billion (\$4.7 billion).

When will the energy storage scheme be launched in Poland?

Call for applications under the Scheme "Energy storage facilities and related infrastructure for improving the stability of the Polish electricity grid" will be launched already this year. Subsidy contracts are to be entered into by the end of 2025, while the period for spending the funds ends with 2028.

How many MW rated energy storage systems are there in Poland?

The capacity obligations for these projects ranged from 1.2 MW to 153 MW rated power, with an average capacity of around 30 MW. The decision to reduce the de-rating factor for energy storage systems in the last capacity market auction in Poland from 95 percent to 61 percent did not prove detrimental to the market.

How can energy storage support Poland's electricity system?

By addressing challenges such as peak load balancing and frequency regulation, energy storage enhances the resilience and flexibility of Poland's electricity system. The storage support program is expected to begin accepting applications in the second quarter of 2025. Full details and deadlines will be published by the NFOŚiGW.

How much PLN is available for energy storage in Poland?

PLN 4 billion available. On 23 July 2024, the National Fund for Environmental Protection and Water Management put under public consultation a new priority aid scheme entitled: “Energy storage facilities and related infrastructure for improving the stability of the Polish electricity grid”.

Total investment cost of utility scale ESS project in Poland

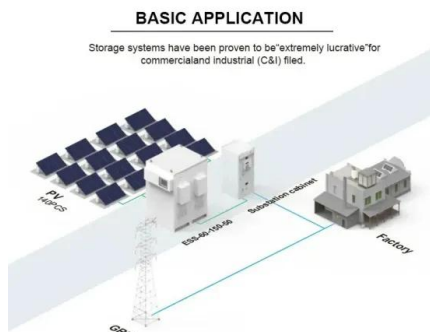

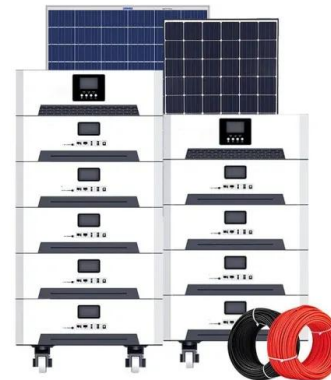

'Energy storage guarantees energy security for Poland'

A total of PLN 4.15 billion, or EUR992 million (US\$1.07 billion), is available, split 90:10 between grants and loans. Grants can cover up to 45% of investment costs, 10%-20% more for smaller businesses, while loan financing ...

BESS Costs Analysis: Understanding the True Costs of Battery

System Size and Capacity Larger systems cost more, but they often provide better value per kWh due to economies of scale. For instance, utility-scale projects benefit from ...

Subsidies for energy storage systems , Rödl & Partner

The call for proposal's budget is 893,460,000 zloty. The aid will be provided in the form of subsidies of up to 45% of eligible costs which may be spent by 30 June 2026 at the ...

European Commission approves support for 'at least

...

The European Commission (EC) has approved a EUR1.2 billion state aid package for Poland to

support the deployment of electricity storage.

Aid scheme for construction of electricity storage

Subsidies in the form of grants are to cover a maximum of 45 percent of the total investment cost. The aid intensity can be increased by 20 percentage points for small ...

Northvolt raises \$1.2bn and Northvolt Dwa produces ...

As Northvolt assembles its first battery systems at Northvolt Dwa in Poland, the company today announced the raising of \$1.2 billion to finance plans for its further European and North American expansion. The funding is ...
