

## Global PV Storage Insights

# Turnkey solar plus storage EPC contract price in Mexico

## Overview

---

What is a turnkey EPC contract?

The key thing to note is that with a turnkey EPC contract, you can't get just a piece of the package. For example, if you just want to dip your toe into solar to see if it would be a good fit for your business, an EPC contract won't allow you to just purchase an energy assessment or a site survey - you have to buy the entire solar package.

What is a turnkey solar system?

VeloSolar • Updated on March 13, 2023 • 8 minutes read In the solar world, Engineering Procurement and Construction (EPC) contractors typically provide a turnkey service. They deliver a ready-to-use solar system; when they're done working, all you have to do is turn the proverbial key and you're generating your own clean, renewable energy.

How does an EPC contract work?

Here's how it works: The scope of work for your solar project is laid out in the initial EPC contract, as is the lump sum cost of the project. The contract price includes everything that's needed to design, build, and install your turnkey system.

What does a solar EPC contractor do?

To aid in their ability to deliver turnkey projects, solar EPC contractors usually offer every customer a very similar set of services. Most contracts include a simple solar system design and basic engineering services, as well as the materials and labor required to install and commission that system.

Why should you sign an EPC contract with a solar provider?

When you sign an EPC contract with a solar provider, that company alone is responsible for developing and installing your entire solar system, from the design to final construction. They procure all the equipment and materials

necessary to build your solar installation. They also serve as a single point of contact for you, the customer.

How do turnkey projects work?

This is why we thought it would be worthwhile to take a few minutes to explain how turnkey projects work. With a turnkey contract, one entity is responsible for the complete scope of work related to your project, from the development, design, and construction to the ultimate deployment or commissioning of the end product.

- 
**Efficient Higher Revenue**
  - Max. Efficiency 97.5%
  - Max. PV Input Voltage 600V
  - 100% Peak Output Power
  - 240V Modules, 500V DC Input Overvoltage
  - Max. PV Input Current 55A, Compatible with High-Power Modules
- 
**Intelligent Simple O&M**
  - IP65 Protection Degree: support outdoor installation
  - Smart I/F Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
  - DC & AC Type II SPD: prevent lightning damage
  - Battery Reverse Connection Protection
- 
**Flexible Abundant Configuration**
  - Plug & Play, EPC Switching Under 10min
  - Compatible with Lead-acid and Lithium Batteries
  - Max. 6 Units Inverters Parallel
  - AFC Function (Optional): when an arc fault is detected the inverter immediately stops operation

## Solar power plants in Mexico: financing and construction

We have been present in this market for many years, financing and building solar parks under an EPC contract. Our specialists are ready to help the investor at any stage of the solar energy project in Mexico.
