VRFB energy storage tender price in Spain 2026

Overview

How much money will Spain spend on energy storage projects?

Spain's ministry for the ecological transition said on Friday it will allocate EUR 700 million (USD 799.4m) in grants through competitive tendering to support large-scale energy storage projects in an effort to improve grid flexibility and integrate more renewables. Vanadium redox flow battery installed at the Son Orlandis solar farm in Mallorca.

Where is a VRFB battery installed?

The 1.1MW/5.5MWh flow battery has been installed at Enel Green Power Espana's 3.34MWp Son Orlandis solar PV plant in the Mallorcan municipality of Palma. The VRFB was provided by Largo Clean Energy, the recently established downstream arm of primary vanadium producer Largo Resources.

Who is behind the VRFB project?

The VRFB was provided by Largo Clean Energy, the recently established downstream arm of primary vanadium producer Largo Resources. Enel Green Power posted some pictures of the project to X (formerly Twitter) on 18 March with the comment that the plant "paves the way for a sustainable, fossil-free future."

Can energy storage projects get 85% co-financing?

Standalone and renewables-plus-storage battery projects can apply for up to 85% co-financing, along with pumped hydro and thermal energy storage sites. Friday saw the publication of a call for applications for energy storage projects hoping to receive support from a €700 million (\$794 million) EU-funded program in Spain.
