## Overview

---

According to EnergyPress, the finalized list stands as follows: Bids in the tender round were priced at between EUR 33,948 per MW and EUR 64,122 per MW, with the weighted average price of the successful proposals standing at EUR 49,748 per MW annually. Bids were capped at EUR 115,000.

According to EnergyPress, the finalized list stands as follows: Bids in the tender round were priced at between EUR 33,948 per MW and EUR 64,122 per MW, with the weighted average price of the successful proposals standing at EUR 49,748 per MW annually. Bids were capped at EUR 115,000.

The initial program asked for 1 GW of battery capacity to be tendered in three separate procurement exercises of 400 MW, 300 MW and 300 MW. However, in December 2024, Greece downsized the third auction to 200 MW. The first two auctions concerned projects installed anywhere in Greece, while the

According to EnergyPress, the finalized list stands as follows: Bids in the tender round were priced at between EUR 33,948 per MW and EUR 64,122 per MW, with the weighted average price of the successful proposals standing at EUR 49,748 per MW annually. Bids were capped at EUR 115,000 per MW per.

As for the average price, it landed at EUR 52,589.16 per MW per year in the auction. The lowest offer was EUR 43,927 per MW, by HELLENIQ Renewables, while the highest was EUR 58,773 per MW, by Plain Solar. The average prices in the first and second auctions were EUR 49,748 per MW and EUR 47,680 per.

The starting price for the first tender for battery energy storage projects is set at €115,000 per megawatt per year (€/MW/year). In other words, in order to claim the granting of investment and operating aid, investors should submit offers that will move below the specific amount. The owners of.

Greece has officially launched its third tender for battery energy storage capacity, aiming to allocate 200 MW of projects eligible for subsidies of up to 200,000 euros per MWh. This tender marks the final phase of Greece's ambitious 1 GW program, which is designed to support the development of.

These units will receive an average operational support slightly above €48,000 per megawatt. The highest bid was submitted by Plain Solar at €58,700 per megawatt, while the lowest came from Ecosolar at €42,500 per megawatt. The average bid price was lower than that of the first competitive process. How many mw subsidized battery storage in Greece?

Home » News » Renewables » Greece awards 188.9 MW for subsidized battery storage in final auction Greece's third energy storage auction has been completed, with nine projects selected and a capacity of 188.9 MW.

How many projects have been awarded in Greece's first battery energy storage system?

The Greek Regulatory Authority for Energy has confirmed that 411.8 MW of projects have been awarded in the country's first standalone battery energy storage system (BESS) tender, which has attracted huge interest among developers. Investment and operating aid will be granted to 12 projects put forward by seven proponents.

What is the highest subsidy for a battery project in Greece?

The highest awarded subsidy came at €58773/MW/year and refers to a 7.9 MW/31.6 MWh project located in the same region. Greek firm Hellenic Renewables, which is a subsidiary of Helleniq Energy, offered the lowest successful bids for two battery projects of 25 MW/100 MWh each.

How many renewable electricity auctions will Greece hold in 2024?

The Greek Ministry of Environment and Energy released an updated version of the timetable for renewable electricity auctions. The new schedule sets the time and the capacity for each auction, while it calls for four auctions to be held this year and five in 2024.
