

Global PV Storage Insights

Wholesale residential solar battery price list in Singapore

Overview

Should you invest in solar batteries in Singapore?

For most solar homeowners in Singapore, we don't currently recommend investing in solar batteries. Why, you ask?

Well, mainly due to the high initial cost and relatively modest returns on investment. Plus, you might need more frequent maintenance due to the current state of storage technologies.

Why are solar batteries not working in Singapore?

Like most batteries, they naturally lose storage capacity over time, leading to shorter cycle lives. And, let's not forget the sweltering heat of Singapore, especially during the peak of the year. Unfortunately, high temperatures can accelerate the degradation of solar batteries, making them less effective as time passes.

Why should you invest in the battery industry in Singapore?

When exploring the battery industry in Singapore, several key considerations emerge. The country is positioned as a significant player in the global battery supply chain, driven by its strategic location and robust infrastructure.

Are solar batteries a good investment?

Solar batteries are fantastic for storing the energy generated by your solar panel system independently from the grid. And here's the exciting part: they can be a perfect match for a non-standard price plan. These personalised plans often charge higher rates during your peak usage hours and lower rates during off-peak times.

Should you buy a solar storage system?

If so, a solar storage system might be the next logical step for you. Solar batteries are fantastic for storing the energy generated by your solar panel

system independently from the grid. And here's the exciting part: they can be a perfect match for a non-standard price plan.

Should you store surplus energy in a solar storage system?

Storing surplus energy in a solar storage system comes with a trade-off—you miss out on valuable financial incentives like the Simplified Credit Treatment (SCT) Scheme and the Enhanced Central Intermediary Scheme (ECIS). These programs enable you to sell any excess energy generated by your solar panel system back to the grid in Singapore.
